We use unreal conditionals to talk about:

A situation that is not real, but that we imagine.

Are these real situations?

Do I really have money?

Do they really finish their homework?

NO! these are imaginary situations

How do we make this type of conditional grammar? Look at these examples:

1. **If** my friend **asked** me for money, I **would lend** it to her.
2. Tomas **would be** happier **if** he **got** a less stressful job.
3. Speaking in English **would be** easier **if** you **practiced** more frequently.

If + Past Simple …, …would (wouldn't) + V

… would (wouldn't) + V … if + Past Simple
